## B - Thermostat Knob

- This knob is used to control the temperature of the freezer and refrigerator automatically. It can be set to any value between the ”0” and “3” positions.
- “ 0 “ position indicates that the thermostat is “off ”The refrigerator is “off ” in this setting.
- By turning the knob from “1” to ”3” positions , you can increase the cooling degree.
- The refrigerator is designed to get optimum performance when the thermostat knob is set in the middle position.
